

Docket No. 005217.P049
Stoel Rives Ref. 50588/390
Digeo Ref. 39

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of

Anthony F. Istvan et al.

Confirmation No. 8903

Application No. 09/877,696

Filed: June 8, 2001

For: **SYSTEMS AND METHODS FOR
ACCESSING INTERACTIVE
CONTENT VIA SYNTHETIC
CHANNELS**

Group Art Unit: 2611

Examiner: Andrew Y. Koenig

Date: April 26, 2006

DECLARATION OF HIROHISA TACHIBANA UNDER 37 CFR § 1.131

I, Hirohisa Tachibana, hereby declare that:

1. At all times relevant to this Declaration, I was General Counsel of Digeo, Inc., assignee in the above-identified application.
2. On August 21, 2000, I received an e-mail from Anthony Istvan, one of the named inventors, detailing an invention for including synthetic channels in an electronic program guide ("Invention Disclosure"). A copy of the Invention Disclosure is attached hereto as Exhibit A.
3. I forwarded a copy of the Invention Disclosure to outside counsel by e-mail on August 24, 2000.

4. Outside counsel was instructed to prepare each assigned application, including the above-identified application, as expeditiously as possible.

5. Outside counsel was not instructed assign a higher or lower priority to the above-identified application than other assigned applications.

6. On information and belief, the present application was not treated any differently from other assigned applications.

7. A total of 112 applications were filed through outside counsel between August 21, 2000 and June 8, 2001. A copy of the assignee's docket report from the relevant period is attached hereto as Exhibit B.

8. The approximately 9 1/2 month delay in filing between August 21, 2000 and June 8, 2001 was attributable the backlog of the 112 other cases to be filed by the assignee.

9. I declare that those statements made of my own knowledge are true, and that all statements made on information or belief are believed to be true. This declaration is being made knowing that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. § 1001) and may jeopardize the validity of the application or any patent issuing thereon.

Hirohisa Tachibana

Date: April 26, 2006

EXHIBIT A

From: "Hiro Tachibana" <hiro@digeo.com>
To: "James K. Okamoto" <jkokamoto@townsend.com>
Date: Thu, Aug 24, 2000 3:39 PM
Subject: FW: More Patents

James, can you give me a call? Hiro

Subject: More Patents

Here are some more patent ideas. Please assign the necessary legal resources. The first two are related, but I wanted to separate the one with specific EPG usage out since it will no doubt be challenged by TV Guide/Gemstar at some point.

Thanks,

Tony

Real Time Synchronization of Computer and Television

37

Anthony Istvan

As we move forward with our various product lines, we will end up with a single user experience and identity that spans multiple display devices (thick client STB, thin client STB, PC, web pad, cell phones, palm pilots, etc...). There will be the capability for a single user to be actively using multiple devices concurrently. In such an environment, it makes sense to allow the user to choose the device that is best suited for the content and circumstance. There is also the possibility that an indicator may occur on one device, and the user would prefer to respond to the indicator on a different device. The devices can include PCs, cell phones, hand held computers, pagers, etc. Basically, anything that can communicate with a server.

For example, an ATVEF trigger may be embedded in the broadcast stream. The trigger signals a buying opportunity on the television display by means of an on screen icon. The user may have a laptop computer they are currently using to read email. They then use the laptop to pursue the buying opportunity instead of clobbering the television display, which is being viewed by others at the same time. It also allows the user to use a device with a better display for the type of content being accessed.

In order to facilitate such cooperation, we must rely on the client server architecture that is being created to support the STB. The server must be the mediator of communication between the various clients. The clients can use only a web browser that polls the server periodically, or we can have resident applications on the clients that can receive signaling events from the server. Once the event is handed off to the second device, the first device is no longer needed.

It is also possible for two or more viewers in the same room to pursue the same signal without interfering with each other. The important aspect is that shared device (the STB and television display) makes the event known to the server, and that the server can send the event to one or more clients.

The event can be pushed or pulled.

Setting Events for a STB using a PC

38

Anthony Istvan

A STB can provide a suite of services to the viewer. Many of these services are naturally accessed from the EPG. These include setting reminders for TV programs and programming a digital video recorder (DVR). This patent expands access to this functionality, making it accessible from other devices that have access to the network on which the STB resides.

For example, a user is at the office. They realize that they are going to have to work late, and that there is a television program that they intended to watch that they are now going to miss. But wait, they can instead log in to their account and access information pertaining to the evenings program line up. They find the show they are interested in and choose the record option. The record event is transmitted through the network to the STB that contains DVR functionality. As a result, the selected program is recorded and is waiting for the user when they finally get home.

If there is only one STB in the house that contains the DVR functionality, or a separate DVR device all together, then other STBs could also be used to set the DVR event.

This also works the other way as well. If the user set a reminder to watch a program, we would enable the option to signal the reminder on their PC as well. The reminder could manifest itself as an email, or through some sort of resident application on the device. The device could be a PC, a cell phone, a web pad, or any other type of communication device. This is similar to the first patent description.

Using an EPG to Manage Synthetic Channels

39

Anthony Istvan
Jim Billmaier
Robert Novak

The existing typical television environment consists of a television with a connection to a broadcast network that consists of many television channels. Since the user is used to this channel metaphor, it makes sense to extend the metaphor when adding interactive content to television experience. The existing programming content is referred to as broadcast channels, while the new interactive content is referred to as synthetic channels. Synthetic channels can consist of functional channels, system channels, and content channels. The system channels is where the user administers the STB environment. The functional channels provide access to applications that run on behalf of the user (email, calendar, photo albums, etc.). The content channels are informational in nature (news, weather, sports, etc.).

In order to mimic the behavior of traditional broadcast channels, access to the synthetic channels should be granted in a similar manner. This can include placing them in the EPG or allowing the user to access them by directly entering a channel number in their remote control. In one model, only the entry point of the synthetic channel is accessible using these methods. For example, the start page page of the mail application or the home page of the news channel. Another model allows for every page that compose a particular channel to be accessible.

					<i>Title: INTERACTIVE COMPANION SET-TOP BOX</i>	
45/ United States of America	PR1	09/768,019 23-Jan-2001		6,630,963 07-Oct-2003	Granted	
						23-Jan-2021
					<i>Attorney(s): SR</i>	
					<i>Classification Ref:</i>	
					<i>Agent Ref:</i>	
					<i>Title: SYNCHRONIZING A VIDEO PROGRAM FROM A TELEVISION BROADCAST WITH A SECONDARY AUDIO PROGRAM</i>	
45.1/ United States of America	CIP	09/778,994 07-Feb-2001		6,710,815 23-Mar-2004	Granted	
						23-Jan-2021
					<i>Attorney(s): SR</i>	
					<i>Classification Ref:</i>	
					<i>Agent Ref:</i>	
					<i>Title: SYNCHRONIZING MULTIPLE SIGNALS RECEIVED THROUGH DIFFERENT TRANSMISSION MEDIUMS</i>	
47/ United States of America	PR1	09/863,896 23-May-2001	02-0175944 29-Nov-2002	6,762,773 13-Jul-2004	Granted	
						23-May-2021
					<i>Attorney(s): SR</i>	
					<i>Classification Ref:</i>	
					<i>Agent Ref:</i>	
					<i>Title: SYSTEM AND METHOD FOR PROVIDING A CONTEXT-SENSITIVE INSTRUCTIONAL USER INTERFACE ICON IN AN INTERACTIVE TELEVISION SYSTEM (overlays remote buttons on screen)</i>	

Patent List

Case Number/Subsense Country Name	Case Type	Application Number/Date	Publication Number/Date	Patent Number/Date	Status Expiration Date
47.1/ United States of America	PRI Owner Name: Classification: User Interface Agent Name: Stoel Rives LLP Title: SYSTEM AND METHOD FOR PROVIDING FOREIGN LANGUAGE SUPPORT FOR A REMOTE CONTROL DEVICE (foreign language support for a remote control)	09/863,895 23-May-2001		6,559,866 06-May-2003	Granted 23-May-2021
5.1/ United States of America	ORD Owner Name: Classification: User Interface Agent Name: Townsend and Townsend Title: AUDIO SOURCE CONTROL TECHNIQUES	09/687,586 13-Oct-2000			Pending
52.1/ United States of America	PRI Owner Name: Classification: Electronic Programming Guide Agent Name: Stoel Rives LLP Title: SYSTEM AND METHOD FOR DELIVERING RADIO PROGRAMS AND RELATED SCHEDULE INFORMATION (radio epg for itv)	09/789,175 20-Feb-2001			Pending
52.1/ United States of America	CIP Owner Name: Classification: Electronic Programming Guide Agent Name: Stoel Rives LLP Title: RADIO ELECTRONIC PROGRAM GUIDE FOR A MOBILE DEVICE	09/851,528 08-May-2001			Pending

卷之三

Case Number/Subcase Country Name	Case Type	Application Number/Date	Publication Number/Date	Patent Number/Date	Status Expiration Date
54/1 United States of America	PRI 21-Feb-2001	09/790,216			Pending
	<i>Owner Name:</i> <i>Classification:</i> Subscriber Management <i>Agent Name:</i> Stoel Rives LLP <i>Title:</i> SYSTEM AND METHOD FOR PROVIDING DIRECT, CONTEXT-SENSITIVE CUSTOMER SUPPORT IN AN INTERACTIVE TELEVISION SYSTEM				<i>Attorney(s):</i> SR <i>Classification Ref:</i> <i>Agent Ref:</i>
54.1/ United States of America	PRI 29-Mar-2001	09/821,829			Pending
	<i>Owner Name:</i> <i>Classification:</i> E-Commerce <i>Agent Name:</i> Stoel Rives LLP <i>Title:</i> SYSTEM AND METHOD FOR FACILITATING SALES USING AN INTERACTIVE TELEVISION				<i>Attorney(s):</i> SR <i>Classification Ref:</i> <i>Agent Ref:</i>
54.2/ United States of America	PRI 21-Feb-2001	09/789,917			Pending
	<i>Owner Name:</i> <i>Classification:</i> Subscriber Management <i>Agent Name:</i> Stoel Rives LLP <i>Title:</i> SYSTEM AND METHOD FOR PROVIDING DIRECT, CONTEXT-SENSITIVE CUSTOMER SUPPORT IN AN INTERACTIVE TELEVISION SYSTEM				<i>Attorney(s):</i> SR <i>Classification Ref:</i> <i>Agent Ref:</i>
56/ United States of America	PRI 30-Mar-2001	09/823,946			Pending
	<i>Owner Name:</i> <i>Classification:</i> E-Commerce <i>Agent Name:</i> John C. Stewart <i>Title:</i> SYSTEM AND METHOD TO PROVIDE AUDIO ENHANCEMENTS AND PREFERENCES FOR INTERACTIVE TELEVISION				<i>Attorney(s):</i> JCS <i>Classification Ref:</i> <i>Agent Ref:</i>

Patent List

Case Number/Subcase Country Name	Case Type	Application Number/Date	Publication Number/Date	Patent Number/Date	Status	Expiration Date
6,17 United States of America	CIP	09/747,309 20-Dec-2000	US02-56083 09-May-2002		Published	
					<i>Attorney(s): TT</i>	
					<i>Classification Ref:</i>	
					<i>Agent Ref:</i>	
					<i>Title: SYSTEM AND METHOD FOR PICTURE-IN-BROWSER SCALING (Picture-In-Browser II)</i>	
63J United States of America	PRI	09/823,917 30-Mar-2001			Pending	
					<i>Attorney(s): COJ</i>
